

An Introduction to Section 106 of the National Historic Preservation Act

(36 CFR PART 800 -- PROTECTION OF HISTORIC PROPERTIES)

For OBD Projects in Kentucky

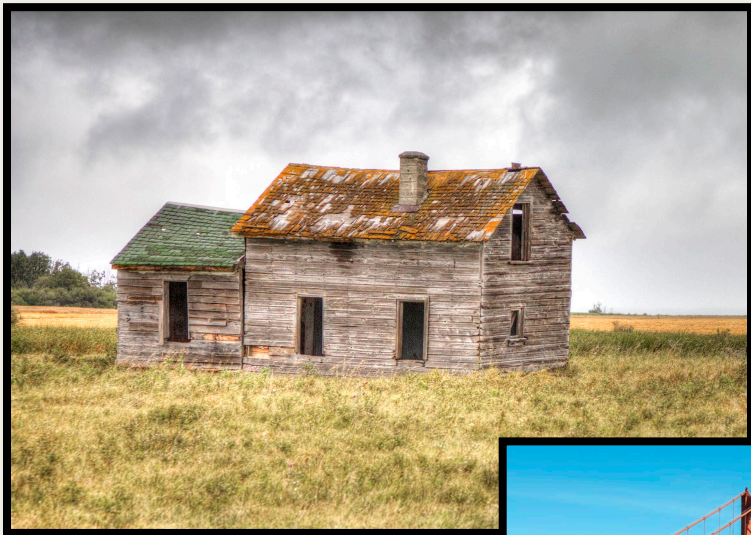

Presented by the KY SHPO

The National Historic Preservation Act of 1966 (NHPA):

- Was created in response to public pressure.
- Built upon previous legislation, such as the Historic Sites Act of 1935.
- Created the National Register of Historic Places (NRHP), a national list of Historic Properties.
- Called for the National Park Service to develop a uniform criteria of significance applicable to historic/cultural sites.
- Made room for sites significant at the local or state level (not just national).
- Established the Advisory Council on Historic Preservation (ACHP).
- Mandated the establishment of a State Historic Preservation Officer (SHPO) in each state, and the creation of a State Historic Preservation Office (also called SHPO).
- Section 106 of the NHPA requires Federal agencies to take into account the effects of their undertakings on historic properties.
- A 1976 amendment specified that not only listed properties, but also properties found eligible for listing on the NRHP must be considered for protections from federal impacts.

What's a historic property?

- Any “prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion on, the National Register of Historic Places, including artifacts, records, and material remains related to such a property or resource.” – 54 U.S.C.§300308

What's the National Register of Historic Places?

- A list of properties that meet the National Park Service's Criteria of eligibility.
- Properties should be assessed by a professional meeting the Secretary of the Interior's Qualifications for the corresponding property type.
- Properties can be Not Eligible/Ineligible, Unassessed, Potentially Eligible, Eligible, or Listed.
- A 1976 amendment to the NHPA specified that not only listed properties, but also properties found eligible for listing on the NRHP must be considered for protections from federal impacts.
- Properties can be significant at the local or state level.

What's Section 106?

“Section 106 of the National Historic Preservation Act requires Federal Agencies to take into account the

effects of their undertakings on historic properties and afford the Council (Advisory Council on Historic Preservation [ACHP]) reasonable opportunity to comment on such undertakings.”

— 36 CFR 800.1

The Section 106 Process is a Conversation

The NRHP was crafted largely by bureaucratic process, but its origin lies in the attempt to protect those places that speak to the community.

- “The agency official shall involve the consulting parties described in paragraph (c) of this section in findings and determinations made during the section 106 process.” – 36 CFR 800.2
- Paragraph C:
- State historic preservation officer.
- Indian tribes and Native Hawaiian organizations.
- Representatives of local governments.
- Applicants for Federal assistance, permits, licenses and other approvals.
- Additional consulting parties (the public).

Common Misconceptions about Section 106 of the National Historic Preservation Act and my office. The reality is:

Having a property listed on the
NRHP
does NOT automatically protect it

Section 106 does NOT stop
construction
or slow down projects

The goal of Section 106 is NOT to
protect every cultural resource

SHPO Cannot Issue
Permits

SHPO Cannot “Clear” a
Project

SHPO letter IS
REQUIRED

The State Historic Preservation Office (SHPO) provides comments on the impacts of federally funded or permitted projects, or projects on federal land.

- The NHPA mandated SHPOs but did not tell them how to run.
- Each state, each tribe, and each other consulting party has their own way of doing things.
- Our office has developed a Policy for OBD projects.

Kentucky Heritage Council State Historic Preservation Office

Who We Are

An agency of the Kentucky Tourism, Arts and Heritage Cabinet, the Kentucky Heritage Council is the State Historic Preservation Office, responsible for the identification, protection and preservation of prehistoric resources and historic buildings, sites and cultural resources throughout the Commonwealth.

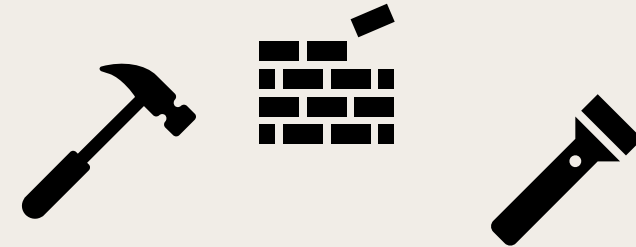

KHC's Historic Preservation Team and Tools

Site Identification

- Kentucky Main Street Program
- Heritage Commissions

(Vacant)

Site Protection and Archaeology (The Section 106 Team)

- When fully staffed, we have 3 archaeology reviewers and 3 above-ground reviewers.
- 4 are transportation liaisons, dedicated to transportation-focused federal agencies.
- There are about 45 federal agencies.
- We have about 250 active agreement documents.
- We reviewed about 750 submissions from April 1 – June 30, 2024. 650 to 750 is about average for our office.
- Most of these reviews require two reviewers.

Notes

The Section 106 process helps us identify and possibly preserve important cultural resources. The SHPO provides comments on these resources and the projects that may impact them.
But how?

Submissions!

- The order of consultation (or, the things we need to concur on):
 1. Establishing the Area of Potential Effects (APE).
 2. Establishing if Historic Properties are present.
 - Do we need reports?
 - Do we need survey forms?
 3. Establishing Effects.
 4. Establishing Avoidance, Minimization,
 - or Mitigation (if needed).

What are you doing?

We need details.

Where are you doing it?

The area of potential effect (APE)

The APE includes height, width, depth...and time.

Are there Historic Properties?

Record Checks

- Archaeology:
 - At last count, there are over 30k recorded sites, and less than 10% of the state has been surveyed.
 - The Office of State Archaeology at the University of Kentucky
 - <https://anthropology.as.uky.edu/office-state-archaeology>
 - Not in our office
 - Two types of checks:
 - Preliminary Records Review:
 - Has your APE been surveyed?
 - Are there known sites within or adjacent to your APE?
 - Are any of the sites Historic Properties?
 - \$40
 - Project Registration and Request for Archaeological Site and Project Area Information
 - May only be submitted by professional archaeologists who meet the Kentucky Heritage Council's qualifications for a Principal Investigator (SOI-qualified)
 - Details about sites
 - \$140
- Above-Ground Resources:
 - The Kentucky Heritage Council
 - <https://heritage.ky.gov/historic-places/resources-survey/prelim/Pages/default.aspx>
 - Is in our office (but a different department)
 - Historic Structure Records
 - Are there known sites within or adjacent to your APE?
 - Are any of the sites historic?
 - A site check of historic structures can be performed by an applicant free of charge through the KHC Cultural Resource Web Portal .

The ACHP Program Comment on Federal Communications Projects

- Expanded to include broadband in spring of 2024.
- Includes Categories of projects that may be excluded from Section 106 review, but should be reported to the ACHP, NCSHPO, and NATHPO annually. These projects may be excluded “when certain thresholds are met.”
- What’s not excluded? Essentially, projects that may affect Historic Properties.
- Several categories include the condition “when a records check confirms no historic properties within the area of potential effect.”
- A FAQ is available at: <https://www.achp.gov/digital-library-section-106-landing/frequently-asked-questions-pc-federal-communications>

Notice of Policy - May 10, 2024

Re: Statewide Programmatic Approach to Section 106 Submissions for Projects Submitted by state partners or individual applicants for compliance with 36CFR800 (aka Section 106) of the National Historic Preservation Act (NHPA) through the Commonwealth's Office of Broadband Development (OBD)

The purpose of this Agreement is to streamline the submission and review process for Office of Broadband Development (OBD) undertakings. The goal of this programmatic approach is to accommodate the increased workload for state projects with federal funding, particularly those with multiple project areas per submission. The audience for this guidance are our state partners at OBD and consultants meeting the Secretary of Interior's professional qualifications for a preservation field who have their curriculum vitae on file with the Kentucky Heritage Council and who have received a response letter from our office acknowledging that we have had the opportunity to compare the consultants' qualifications with federal guidance.

This document sets forth what information we require based on the project type under the OBD Program. Consultants should compile this information in the form of a detailed overview or literature and records review. The content of this document should include:

- a project description for each location;
- a listing of known cultural resources within the project footprints (archaeological and above ground resources) and/or viewsheds (for above ground resources or mound/village centers, caves, and rockshelters);
- National Register status of each resource; proposed treatments of these resources (or modification of project parameters, if feasible and appropriate);
- the probability for the presence of unidentified cultural resources within the project footprint and/or viewshed, as applicable; and
- the level of cultural resource management effort (proposed Scope of Work) based on these data

Please note: Recommendations provided to KHC by consultants do not constitute or fulfill the Section 106 consultation process. This background research provides our applicants throughout the Commonwealth a streamlined alternative to expedite the review process with the KHC to the extent possible. KHC will use this information to determine what level of additional documentation, investigation, or survey is warranted, if any, and will inform the Office of Broadband Deployment (OBD) or their applicants.

- Projects should be submitted to our office via khc.section106@ky.gov
- Our office has developed a policy for OBD undertakings
- Different types of project activities have different impacts and require different information
- Our policy is designed to tell us what we need to know in order to comment on your project

TEAM

Policy Submission *(Part 3)*

<https://heritage.ky.gov/compliance/applicants/Pages/default.aspx>

- OBD projects are often massive, and more expansive than other types of projects.
- The Literature and Records Review is a professional analysis of your project area. This must be completed by a professional meeting the Secretary of the Interior's Qualifications for the corresponding property type.
- This document sets forth what information we require based on the project type under the OBD Program. Consultants should compile this information in the form of a detailed overview or literature and records review. The content of this document should include:
 - ☐ a project description for each location;
 - ☐ a listing of known cultural resources within the project footprints (archaeological and above ground resources) and/or viewsheds (for above ground resources or mound/village centers, caves, and rock shelters);
 - ☐ National Register status of each resource; proposed treatments of these resources (or modification of project parameters, if feasible and appropriate);
 - ☐ the probability for the presence of unidentified cultural resources within the project footprint and/or viewshed, as applicable; and
 - ☐ the level of cultural resource management effort (proposed Scope of Work) based on these data

Our Policy and the Program Comment

content of lit. and rec.: agency shall have a QP:

1. a project description for each location;
2. a listing of known cultural resources within the project footprints (archaeological and above ground resources) and/or viewsheds (for above ground resources or mound/village centers, caves, and rock shelters);
3. National Register status of each resource; proposed treatments of these resources (or modification of project parameters, if feasible and appropriate);
4. the probability for the presence of unidentified cultural resources within the project footprint and/or viewshed, as applicable; and
5. the level of cultural resource management effort (proposed Scope of Work) based on these data

1. Consult with the SHPO/THPO, Indian Tribes, or NHO to confirm the APE for each individual undertaking and provide notification to the appropriate SHPO/THPO, Indian Tribes, or NHO of intent to follow this Program Comment.
- 2 and 3. Identify known eligible or listed historic properties within the relevant APE that may be affected by the undertaking by completing a Records Check.
4. If a Records Check reveals no information on the presence of historic properties within the APE, the qualified professional will consult with the SHPO/THPO, Indian Tribes, or NHO to determine whether, based on professional expertise, familiarity with the area, and similar geomorphology elsewhere, the APE includes areas that have a high probability of containing National Register-eligible properties
5. If they cannot be avoided, the federal agency and applicant will consult with the SHPO/THPO, Indian Tribes, or NHO to determine whether a survey or monitoring program should be carried out to identify historic properties

Consultants

- Properties should be assessed by a professional meeting the Secretary of the Interior's Qualifications for the corresponding property type. (i.e., your consultant must be "SOI-Qualified"/ "A Qualified Professional"
 - "SOI-Qualified" is a national standard; it does not vary by state.
 - Many states maintain a list of consultants.
 - You are not limited to our list (or any state's list).
 - If your consultant does not have a letter from our office accepting their CV, they should obtain one prior to your project. All they need to do is send their CV to khc.section106@ky.gov and we will review it.
 - Kentucky SHPO maintains a list of Qualified consultants at:
 - <https://heritage.ky.gov/compliance/Documents/20240521%20Cultural%20Resource%20Management%20Consultants.pdf>
 - (On the side of the "Applicants" Page. Or, type "consultants" in our website's search bar.)
 - We can also email it to you if you request.
 - Please note: "Based upon information submitted to us, it appears the individuals representing the institutions and firms listed below meet the qualifications established by the Secretary of the Interior for professionalism in archaeology, history, or architectural history and can carry out Section 106 assessments for federally assisted undertakings in Kentucky. Inclusion on this list does not constitute a recommendation or an endorsement of any kind and we are not responsible for the work performed."
- 

Your consultant will need to know:

- What you are doing.
- Where you are doing it.
- Kindly point them to our ODB Policy. This is a new policy from our office, and consultants will need to review it to ensure they send what we need.

You can let your consultant handle communication with our office, or you can do it yourself. It doesn't matter who sends in the submission. YOU will need our letter, though.

Our letter regarding The Determination of Effect

“Our office would concur with a determination (or finding) of...”

- **No Historic Properties Affected:** There are no Historic Properties present. You typically don't need to do anything else.
- **No Adverse Effect to Historic Properties:** There are Historic Properties present, but the undertaking will not adversely affect it/them. You may have conditions you must follow, or else will need additional consultation.
- **Adverse Effect to Historic Properties:** This undertaking will/may impact the qualities that make the Historic Property eligible. This will require additional consultation, but we are available to help!

Timelines

- SHPO officially has 30 days to provide comments.
- Each new submission is a new “30-day clock.”
- Additional information is a new “30-day clock.”
